While it's as affordable as many ordinary telephones, the PowerTouch 390 is far from ordinary.

Plug in this interactive screenphone and discover the variety of new interactive services just waiting for you. You can get stock quotes, make airline reservations, get directory assistance, and much more—right from the screen of your phone. The PowerTouch 390 makes it so easy.

With a large display screen and six changing "softkeys," the PowerTouch 390 walks you through many interactive services, right in your home or office. Information is clearly displayed on the large backlit screen. Then, you can use the softkeys to make your choices from a series of menus.

Subscribe to network services like Caller ID and Call Waiting Display, and you'll see the caller's name and number before you answer*. Even if you're on another call, the PowerTouch 390's display shows who's waiting—and gives you options for handling the waiting call*.

Is this the call you've been waiting for? Just press a key to answer. Or, conference the caller in with your original call.

Can't take the waiting call right now? Send a "please wait" or "call later" message*. Or, just forward the call to Voice Mail*.

When it comes to making calls, the PowerTouch 390's large display screen makes a world of difference. Save up to 200 numbers in your Directory for fast, easy dialing. Place calls without lifting the receiver. The display even offers network services—like Busy Redial—right when they're needed most*.

And, the PowerTouch 390 cuts through the confusion of activating or terminating services such as Selective Call Forwarding, Call Rejection, and Call Acceptance*. You'll never have to flip through pages of information to use the features. The PowerTouch 390's menus remove all the frustration via screen displays and soft keys.

All this plus the exceptional quality of Nortel Networks. The PowerTouch 390 is nothing short of extraordinary.
